2028_REC_OOPS using Java_Week 10_Q3

Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : COD

1. Problem Statement

Priya is analyzing encrypted messages in a research project. She wants to analyze the frequency of each character in a given paragraph. The characters should be stored in a TreeMap so that the output is sorted in ascending order of characters automatically.

You are required to build a Java program that:

Uses a TreeMap<Character, Integer> to count how many times each character appears in the message. Ignores spaces and considers only alphabets (case-sensitive). Outputs the frequencies of characters in sorted order.

You must use a TreeMap in the class named MessageAnalyzer.

Input Format

The first line of input contains an integer n , the number of lines in the message.

The next n lines each contain a string (the encrypted message line).

Output Format

The first line of output prints: "Character Frequency:"

Then print each character and its frequency in the format: "<character>: <count>"

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 2

Hello World

Java

Output: Character Frequency:

H: 1

J: 1

W: 1

a: 2

d: 1

e: 1

l: 3

o: 2

r: 1

v: 1

Answer

```
// You are using Java
import java.util.*;

class MessageAnalyzer {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        int n = Integer.parseInt(sc.nextLine());
        TreeMap<Character, Integer> freqMap = new TreeMap<>();

        for (int i = 0; i < n; i++) {
            String line = sc.nextLine();
            for (int j = 0; j < line.length(); j++) {
                char c = line.charAt(j);
                if (freqMap.containsKey(c)) {
                    freqMap.put(c, freqMap.get(c) + 1);
                } else {
                    freqMap.put(c, 1);
                }
            }
        }

        for (Map.Entry<Character, Integer> entry : freqMap.entrySet()) {
            System.out.print(entry.getKey() + ":" + entry.getValue());
        }
    }
}
```

```
        for (char ch : line.toCharArray()) {
            if (Character.isLetter(ch)) {
                freqMap.put(ch, freqMap.getOrDefault(ch, 0) + 1);
            }
        }
    }

    System.out.println("Character Frequency:");
    for (Map.Entry<Character, Integer> entry : freqMap.entrySet()) {
        System.out.println(entry.getKey() + ":" + entry.getValue());
    }
}
```

Status : Correct

Marks : 10/10
